

Free Downloadable Texas Holdem Poker Calculator Helps Poker Players Find Their Odds

Poker Pro Labs Inc. has announced the release of a new downloadable Texas Hold'em odds calculator. Unlike most poker calculators, this poker calculator lets you determine the percentage and odds of winning without knowing your opponents hands.

San Francisco, CA (PRWeb) November 21, 2006 -- [Poker Pro Labs](#), a leader in online poker calculator and tracking technology, has released a free downloadable Texas Holdem odds calculator.

The off-line poker calculator gives you the odds of winning a particular hand in various situations. Unlike most poker calculators, this poker calculator lets you determine the percentage and odds of winning without knowing your opponents' hands.

"The offline calculator is a great addition to our current product line and is a great addition to any poker player's arsenal of tools," says Len Mugin, COO of Poker Pro Labs.

"The calculator has an easy to use drag and drop interface so all you need to do is select how many opponents you are playing against and your pocket cards. You will know your chance of winning and a chance of tying for every hand. You can also add cards to your opponents and see how that affects the outcome."

The new off-line poker calculator is similar to the chance of winning calculator found within the online Poker Pro 2006 tool. The main difference is that Poker Pro 2006 automatically captures the cards in real-time as you play at an online poker room like Party Poker (PRTY), Pacific Poker (888) or PokerStars. The new downloadable version lets you view the odds without having to connect to a poker site.

Download your free copy at [Poker Pro Labs](#).
